

OEM High Power SlowLight™ Lasers

The Lowest Noise Laser on Earth PERIOD!

The Ethernal™ SlowLight™ lasers from Orbita Lightwave represent the state of the art in high power laser oscillators. The breakthrough “virtual ring” laser technology enables traveling wave and slow light oscillation in a compact, linear cavity. The traveling wave oscillator results in high power (>350mw), high signal to noise (>85dB) and record side-mode suppression (>75dB) ratios. We also offer amplified lasers with up to 2.5 W output power. This is while maintaining best in class <10Hz linewidth, >75dBc SMSR and >75dB SNR (>85dB for the pure oscillators)

Remarkably this performance is available in a reliable and robust field-ready packaging. The **StableLase™** technology greatly reduces the susceptibility to shock and vibration. In addition, passive temperature compensation in conjunction with the slow light technology offers the highest frequency stability in the industry. This enables the **Ethernal™ SlowLight™** fiber laser to operate at unprecedented levels of stability and low noise performance for demanding research, industrial or military applications.

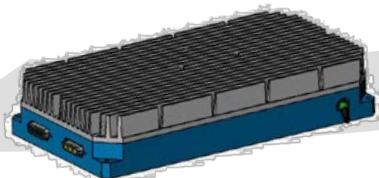

Features:

- Compact all-fiber “virtual-Ring” **SlowLight™**
- Up to 175mw 1550 nm seed laser
Up to 400mw seed @1064
- 0.25-2W
- <10 Hz Lorentzian linewidth
- <200 Hz linewidth over 1ms (optional)
- <1MHz/°C frequency stability
- > 75dB Optical Signal to Noise
- > 75dB Side-mode Suppression Ratio
- <-165dBc/Hz RIN

Applications:

- Acoustic sensing, marine and perimeter security
- LIDAR, ALSM or laser altimetry
- Injection seed lasers
- Coherent Communications
- RF and microwave photonics
- Spectroscopy, gas absorption testing
- Pipeline monitoring, leak detection
- Oil and gas exploration systems
- Metrology
- Space Communication

Ethernal™ SlowLight™ Laser Specifications (preliminary)

Wavelength selectable range (nm)	1530 to 1565	1047 to 1080
Optional Fast ¹ PZT tuning range (GHz)	1, 10	1, 10, 20
Optional Temperature tuning GHz	0, 20, 60	0, 20, 80, 160
Absolute wavelength accuracy (nm)	± 0.05 ± 0.02 optional	± 0.05 ± 0.02 optional
Power stability (%RMS)		± 0.10
Beam Quality		M ² < 1.05
Pure Oscillator/Amplified	Pure Oscillator	Amplified
Output power (W)	0.25-0.4	0.25-2.5
RIN @ 1MHz (dBc/Hz)	< -125	< -125/-130 ⁴
RIN @ 100MHz (dBc/Hz)	< -175	< -165
Lorentzian Linewidth (Hz)	<1	<10
Linewidth over 1ms measurement time (Hz)	< 1000	<400/200 ⁴
Frequency noise (Hz/√Hz) @100Hz	<55	< 55 /<30 ⁴
OSNR (dBc) (0.05 nm RBW)	>85	>75
SMSR (dBc) (3MHz RBW)	> 75	>75
Frequency stability (MHz/°C)	± 20 / 1 ⁵	± 20/1 ⁵
Polarization extinction ratio (dB)		> 23
Fiber pigtail (PM FC/APC as standard)		1m
Operating temp (°C)		10 to 55
Power consumption (W)		30 to 50
Dimensions	2U 19" rack mount	

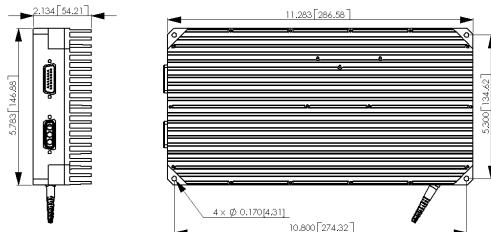

¹ >10kHz modulation bandwidth, >100KHz current modulation option available (-I)

² 0.5-50 W amplified power available with a separate power amplifier

³ Shot-noise limited RIN @ frequency > 50MHz , > 20MHz with SL-130 option with pure oscillator

⁴ with slow light SL seed laser option

⁵ After initial warm-up at room temperature ±1°C , 1MHz/°C with -T option

Ordering Information:

INST - 1000A - 1550.12 - 2 - PZ10B - SL130 - TT - PM

Product Name: INST Optional O/P Fiber Type:
INST PM, SMF

Power (mW): 250-2000(add A for amplified) Optional Freq Tuning
TT

Wavelength (nm): 1530 - 1565 • 1047 - 1080 (In
Vac) Optional Linewidth/RIN
SL130 seed for Amplified
version

Abs. wavelength Accuracy: 5 (±0.05nm), 2 (±0.02nm) Optional PZT Range (GHz)
PZ1, PZ10b
